Summary

An experienced and dedicated professional with a proven ability to effectively communicate and manage time, as well as display empathy in all interactions. These skills were honed through my rewarding work as a Process Operator in the Oil and Gas Industry. Seeking a full stack developer role in a collaborative and supportive work environment, where I can utilize my skills and contribute to the success of the team.

Technical Skills

- Strong problem-solving and analytical skills, with experience in database management systems, including MySQL, Oracle, and MongoDB.
- Proficient in HTML5, CSS3, JavaScript, React.js, jQuery, Node.js, and SQL.
- Experienced in using tools such as Visual Studio Code, Slack, Microsoft Teams, Git Bash, Github, Bit-Bucket, and Insomnia.
- Efficient user with Heroku, Microsoft Azure, and Amazon Web Services (AWS) with an ability to navigate complex infrastructures and leverage the latest tools and resources
- Seasoned with JavaScript frameworks and libraries, Scrum methodologies, product management and client-side state management (Redux).
- Skilled in creating professional design mock-ups and wireframes.
- Knowledgeable in GraphQL, RESTful APIs and Model-View-Controller architectural pattern.

Relevant Experience

Junior Frontend Developer | CircleView | [App](#)

Baton Rouge, La 2023-Present

Led the effort to define and implement the technical specifications required to transform a vanilla JavaScript web application into a Progressive Web Application (PWA). Conducted extensive research on best practices for PWA development and made recommendations on the most suitable approach to meet project goals. Responsible for developing and integrating reusable UI components using React JavaScript library. Implemented Model-View-Controller architecture pattern for efficient code organization and readability.

Junior Frontend Developer | AdviceLane | [App](#)

Houston, Tx 2022-2023

Assumed responsibility for designing, developing, testing, and maintaining customer-facing and internal applications. Utilized Microsoft teams and Adobe xd to communicate and collaborate with the development team. Proven track record of effectively resolving technical issues through debugging, research, and investigation. Dedicated to continuous improvement and the application of best practices in software development.

Education

Boot Camp Certificate: University of Texas, Austin, Texas

Produced applications that applied front and back end development using a variety of languages, frameworks, servers and databases.

Associates of Applied Science: San Jacinto Central, Pasadena, Texas

Completed the Associates of Applied Science degree in Process Technology with extensive hours operating the Honeywell Distributed Control System. Identify and troubleshoot unit field equipment. Illustrated and analyzed piping and instrumentation diagrams.
